CMP7227 – Assessment Brief

Module Title: Data Visualisation			
Module Code: CMP7227			
Assessment Type (delete as appropriate) Time constrained assessment	**Level** 7	**Weighting** 60%	**Word Count** n/a
Submission Date 20th November 2026	**Submission Time** 15.00	**Module Leader** Dr Maite Frutos	**Time Limit (for in person or oral assessments)** 12 minutes

Assessment Brief

Assessment Information	
Assessment Task (dashboard Video Recording)	In this assessment, learners will work in a group to produce a video of a dashboard which displays, in a useful and visually appealing manner, information derived from a relatively large dataset of the group's choice, using Python or another suitable online tool of the group's choice. **Rationale:** A good data scientist needs to be able to convey complex ideas and information in a manner which can be understood at various levels of an organisation, both technical and non-technical. **Description:** Working as a member of a group, the student will produce a video of a dashboard which displays, in a useful and visually appealing manner, information derived from a relatively large dataset of the group's choice, using Python or another suitable online tool of the group's choice. The dataset must be at least 100,000 rows and 5 columns. **Additional Information:** **Groups:** You will be randomly allocated into groups of four people by the module tutor. Dataset: The group will select an appropriate, relatively large set of data from a source of its choosing. The dataset will need to be approved by the module tutor before it can be used for the assignment.

	Tools: It is recommended that you use Python to develop the dashboard, but the group may decide to use another appropriate online tool if they wish. The tool the group wishes to use must be approved by the module tutor before it can be used. For advice on writing style, referencing and academic skills, please make use of the Centre for Academic Success: https://icity.bcu.ac.uk/celt/centre-for-academic-success **Workload:** It is anticipated that each member of the group will contribute up to 24 hours, giving an overall workload up to 96 hours for the group. **Transferable skills:** • Personal Motivation, Organisation and Time Management (Manage and prioritise your workload and time effectively) • Team working skills (working with others) • Technical skills • Communication Skills
Assessment Title	Visualising a relatively large data set
Things to include:	Group Video Recording

Use of Artificial Intelligence

AI use allowed with conditions

AI may be used to support learning (for example, brainstorming potential dataset sources, debugging Python code or troubleshooting dashboard libraries (e.g., Streamlit, Dash, Plotly), understanding complex syntax/functions, structuring the video narrative, and refining script clarity for non-technical audiences) but must not replace your own analysis or be copied directly into submissions.

If you use generative Artificial Intelligence (AI) in the process of completing this assessment you MUST set out clearly the following:

- WHY you used generative AI
- WHAT it was used for
- WHICH AI was used; and
- If any generated content has been used directly in this submission, if so where.

Note that this declaration does NOT contribute towards the word count for the assessment.

You will also have to confirm in your declaration that the work remains yours and you have intellectual ownership of it. You may be invited for an informal conversation to discuss the approach to your assessment. A failure to disclose the use of AI, or the use of a misleading description of its use will be considered academic misconduct. As a result, keeping good records of your interactions is strongly advised.

Completion of this assessment will address the following learning outcomes:	
1	Implement modern data visualisation tools to present complex datasets
2	Communicate the findings of data analysis through a visual medium as part of a presentation

Referencing Style

Please delete as appropriate

- BCU Harvard
- OSCOLA 4th Edition (Law)
- APA 7th Edition (Psychology)
- MHRA (Conservatoire Postgraduate Students)
- Chicago (English)
- IEEE (alternative format for Computing and Engineering Ph.D students)

More information on referencing is available here: https://www.bcu.ac.uk/library/services-and-support/referencing

Use of Artificial Intelligence

Whilst AI tools can be helpful in assisting learning, when it comes to assessment, the Academic Misconduct Procedure is clear that this should be a student's own original work and not the work of other people or AI tools.

The Use of AI Tools – Student Guidelines follows the same guidelines your lecturers use. If you are unsure of whether AI is appropriate within your work, please read the guidelines or ask your lecturer. For advice and guidance around academic writing, please visit BASE (Building Academic Skills and Excellence).

Academic Integrity Guidance

Academic Integrity means completing and submitting your own original work while properly acknowledging sources. Following academic conventions, such as referencing and citation, helps avoid plagiarism. BASE (Building Academic Skills and Excellence) offer resources on Moodle, embedded workshops and 1-2-1 support to improve skills like paraphrasing and referencing.

Academic Misconduct

Academic misconduct is conduct that has or may have the effect of providing you with an unfair advantage by relying on dishonest means to gain advantage and which therefore compromises your academic integrity.

The Academic Misconduct Procedure sets out the process we will follow, and the penalties we may apply, in cases where we believe you may have compromised your academic integrity by committing academic misconduct.

Word Count

The maximum word count for this module assessment is shown on Page 1. A +10% margin of tolerance is applied, beyond which nothing further will be marked. Marks cannot be awarded for any learning outcomes addressed outside the word count.

The word count refers to everything in the main body of the text (including headings, tables, citations, quotes, lists etc.). Everything before (i.e. abstract, acknowledgements, contents, executive summaries etc.) and after (i.e. references, bibliographies, appendices etc) is **not** included in the word count limit.

Submission Information

Present any written aspects of the assessment using font size 11 and using 1.5 spacing to allow for comments and annotations to be added by the markers.

Complete the appropriate cover sheet for this assessment and append your work.

This assessment will be marked anonymously and should show your student number only.

Submit this coursework assessment task via Moodle.

Late Submission

Where you are required to submit assessment by a certain deadline (for example essays, case studies or physical artifacts) but you fail to meet the deadline, your mark will be reduced in accordance with the Late Submissions Policy. This Policy does not apply where the assessment is 'in-person' such as exams and in-class tests.

For support on submission, please review the Submitting Your Assignment e-learning resource.

---------- *FOR STAFF ONLY*----------

Staff Use Only: Retained Work Record	
Details of Retained Work:	Group video submission
Location of Retained Work:	Moodle
Type of Work Retained *(tick all that apply)*:	Written Photo **Video** Other (please provide details below) Other: N/A
