CMP7227 – Assessment Brief

Module Title: Data Visualisation			
Module Code: CMP7227			
Assessment Type (delete as appropriate) Coursework	**Level** 7	**Weighting** 40%	**Word Count** 2000
Submission Date 4th December 2026	**Submission Time** 15.00	**Module Leader** Dr Maite Frutos	**Time Limit (for in person or oral assessments)** N/A

Assessment Brief

Assessment Information	
Assessment Task (dashboard Video Recording)	In this assessment, learners will work individually to produce a report which critically evaluates another group's video/dashboard produced in the first part of the assessment for this module. **Rationale:** A good data scientist needs to have a sound understanding of what makes good data visualisation to be able to make sound judgements and decisions **Description:** Working on your own, produce a report which critically evaluates another group's video/dashboard produced in the first part of the assessment for this module. Critically appraises recent trends in evaluating data visualisation literature. **Additional Information:** **Video/Dashboard:** You will be allocated another group's video/dashboard to critically evaluate **Critical Appraisal part of the report:** Using whatever resources, you deem appropriate, research recent trends in data visualisation and then write a report which critically appraise the recent trends. Your report should include a header page, a contents page, an introduction, a conclusion, any other sections you deem

	relevant and should be referenced correctly using the Harvard referencing method. For advice on writing style, referencing and academic skills, please make use of the Centre for Academic Success: https://icity.bcu.ac.uk/celt/centre-for-academic-success **Workload:** It is anticipated that the total workload will be approximate to sixteen (16) hours to complete. **Transferable skills:** • Personal Motivation, Organisation and Time Management (Manage and prioritise your workload and time effectively) • Research skills • Writing Skills
Assessment Title	Critical Evaluation Report
Things to include:	Individual Written Report

Use of Artificial Intelligence

AI use allowed with conditions

AI may be used to support learning (for example, brainstorming potential dataset sources, debugging Python code or troubleshooting dashboard libraries (e.g., proofreading academic grammar, refining report structure, understanding academic data visualisation literature concepts, or generating search keywords for literature research). However, please note you are STRICTLY PROHIBITED from uploading the allocated peer video, audio, screen recordings, dashboard files, or transcriptions into any generative AI tool to generate analysis, summaries, or critiques. The evaluation of the video and dashboard must strictly be your own independent critical analysis.

If you use generative Artificial Intelligence (AI) in the process of completing this assessment you MUST set out clearly the following:

- WHY you used generative AI
- WHAT it was used for
- WHICH AI was used; and
- If any generated content has been used directly in this submission, if so where.

Note that this declaration does NOT contribute towards the word count for the assessment.

You will also have to confirm in your declaration that the work remains yours and you have intellectual ownership of it. You may be invited for an informal conversation to discuss the approach to your assessment. A failure to disclose the use of AI, or the use of a misleading description of its use will be considered academic misconduct. As a result, keeping good records of your interactions is strongly advised.

Completion of this assessment will address the following learning outcomes:	
1	Critically evaluate methods of data visualisation in terms of presenting data in specific contexts
2	Critically appraise recent trends in data visualisation literature.

Referencing Style

Please delete as appropriate

- BCU Harvard
- OSCOLA 4th Edition (Law)
- APA 7th Edition (Psychology)
- MHRA (Conservatoire Postgraduate Students)
- Chicago (English)
- IEEE (alternative format for Computing and Engineering Ph.D students)

More information on referencing is available here: https://www.bcu.ac.uk/library/services-and-support/referencing

Use of Artificial Intelligence

Whilst AI tools can be helpful in assisting learning, when it comes to assessment, the Academic Misconduct Procedure is clear that this should be a student's own original work and not the work of other people or AI tools.

The Use of AI Tools – Student Guidelines follows the same guidelines your lecturers use. If you are unsure of whether AI is appropriate within your work, please read the guidelines or ask your lecturer. For advice and guidance around academic writing, please visit BASE (Building Academic Skills and Excellence).

Academic Integrity Guidance

Academic Integrity means completing and submitting your own original work while properly acknowledging sources. Following academic conventions, such as referencing and citation, helps avoid plagiarism. BASE (Building Academic Skills and Excellence) offer resources on Moodle, embedded workshops and 1-2-1 support to improve skills like paraphrasing and referencing.

Academic Misconduct

Academic misconduct is conduct that has or may have the effect of providing you with an unfair advantage by relying on dishonest means to gain advantage and which therefore compromises your academic integrity.

The Academic Misconduct Procedure sets out the process we will follow, and the penalties we may apply, in cases where we believe you may have compromised your academic integrity by committing academic misconduct.

Word Count

The maximum word count for this module assessment is shown on Page 1. A +10% margin of tolerance is applied, beyond which nothing further will be marked. Marks cannot be awarded for any learning outcomes addressed outside the word count.

The word count refers to everything in the main body of the text (including headings, tables, citations, quotes, lists etc.). Everything before (i.e. abstract, acknowledgements, contents, executive summaries etc.) and after (i.e. references, bibliographies, appendices etc) is **not** included in the word count limit.

Submission Information

Present any written aspects of the assessment using font size 11 and using 1.5 spacing to allow for comments and annotations to be added by the markers.

Complete the appropriate cover sheet for this assessment and append your work.

This assessment will be marked anonymously and should show your student number only.

Submit this coursework assessment task via Moodle.

Late Submission

Where you are required to submit assessment by a certain deadline (for example essays, case studies or physical artifacts) but you fail to meet the deadline, your mark will be reduced in accordance with the Late Submissions Policy. This Policy does not apply where the assessment is 'in-person' such as exams and in-class tests.

For support on submission, please review the Submitting Your Assignment e-learning resource.

Staff Use Only: Retained Work Record	
Details of Retained Work:	Written report assignment for module CMP7227
Location of Retained Work:	Moodle

Type of Work Retained *(tick all that apply)*:	Written report (.pdf, .docx)

---------- *FOR STAFF ONLY*----------
